

SIH26034 — Legal Rule Engine & Verification Reference v2

FINAL REFERENCE PACK v2 — audited against the current SIH26034 blueprint/build prompts and current official-source requirements.

Authority

Use the Department of Consumer Affairs and official Gazette material for the Legal Metrology Act, 2009 and current Legal Metrology (Packaged Commodities) Rules, 2011 plus amendments. The DCA currently lists amendments through 2026. This document is an engineering guide, not a substitute for the law.

Rule-pack

Each rule stores rule_id, legal citation, effective dates, applicability, required inputs, formula/measurement method, tolerance/rounding, result states, explanation and source reference.

Declarations

Coverage includes manufacturer/packer/importer details, country of origin where applicable, common/generic name, net quantity, manufacture date, applicable best-before/use-by information, MRP inclusive of taxes, consumer care details, relevant dimensions and unit sale price. Exact applicability follows the current rules.

Unit sale price

Calculate the expected value from applicable MRP and quantity and compare with the printed declaration using a legally verified rule/tolerance. Do not assume one formula or exception applies to every package.

Font measurement

Physical measurement is valid only with a passing calibration anchor/quality check. Exact statutory thresholds/tables must be verified from current official rules. Missing/unreliable calibration becomes MANUAL_REVIEW, never a guessed PASS/FAIL.

Sticker signal

Detected overlay/price overwrite is a suspicion for officer confirmation, not an automatic violation.

Results

COMPLIANT, NON_COMPLIANT, MANUAL_REVIEW, NOT_APPLICABLE, PROCESSING_ERROR. Persist the rule-pack version with every analysis/report.
